# Callum David Maclachlan

---

## Personal Summary

I am a highly motivated and dedicated individual with a strong aptitude for learning and a natural interest in programming languages. My attention to detail and ability to identify problems in code have been valuable assets in my recent role.

I'm currently completing an online Full-stack Developer course through CodeCademy to broaden my skills to become a well rounded Developer.

I taught myself various coding languages, such as Python and JavaScript, and have developed a portfolio of websites and software through my self-study and personal projects.

While employed by Onyx Discovery I was involved in two projects; an Internet of Things platform and the development of a fitness app - and have proven my ability to work both independently and as part of a team.

  - Over 10 years customer facing experience
  - Microsoft Office package
  - CMS; WordPress, IONOS
  - Problem Solving
  - Attention to detail
  - Communication and Stakeholder engagement
- 

## Career Summary

[September 2022 - April 2023](#)

[\*\*Junior Software Developer - Onyx Discovery\*\*](#)

As a Junior Software Developer, I have gained experience working on a variety of projects for company clients. I have worked on projects utilising technologies such as React, Ionic, Thingworx, JavaScript/JSX, and CSS to create the desired product for the clients. In this role, I have demonstrated my ability to write logical code and effectively communicate with team members and stakeholders to ensure that their needs are understood and met. In addition, I have shown strong time management and organisational skills as a remote employee, consistently meeting deadlines, and representing the company in a positive manner by building strong relationships with clients.

June 2021 – June 2022

**Youth Practitioner (Key Worker) – Action for Children**

I frequently used Microsoft Office and was able to effectively utilise various tools within the suite to complete tasks. I also took initiative to improve existing files and practices by revamping them to be more uniform and easier to navigate. This required strong organisational skills and attention to detail, and I was able to successfully streamline processes and improve efficiency.

January 2020 - 2021

**Pastoral Care Assistant - NESSSS (North East Surrey Short Stay School)**

I utilised my skills in Microsoft Office, particularly Publisher and PowerPoint, to create lesson plans and presentations for teenagers. This required strong written and visual communication skills, as well as the ability to effectively engage and educate young learners. I was able to utilise the features of these programs to create visually appealing and informative materials that were well-received by my students.

I also used my skills in Excel to develop a scoring system for students. I was able to create a system that accurately calculated and displayed scores, and identified the top-scoring students. This project required attention to detail and a strong understanding of Excel functions and capabilities, and I was able to successfully deliver a solution that met the needs of the school.

December 2012 – January 2020

**Head Coach – Predator Taekwondo CIC (DBS checked & Level 2 Coach Certified)**

As part of my coaching role I was responsible for creating, maintaining and updating the organisation's website and social media pages. This required strong attention to detail and the ability to effectively communicate with a variety of stakeholders, including coaches, students, and parents. I was able to use my skills in web design and content management to ensure that our online presence was up-to-date and accurately reflected the club's mission and values. Additionally, I managed communications with various parties, ensuring that all necessary information was effectively shared and that any questions or concerns were promptly addressed.

November 2014 – October 2019

### **Sales Associate - Esher Fireplaces**

I was responsible for creating and developing the company website using Wordpress. This required strong technical skills and the ability to effectively utilise the Wordpress platform to create a professional and user-friendly website. I have continued to work on the website, adding new features, products, and updates as needed. This has allowed me to demonstrate my ability to take ownership of a project and continuously improve and evolve the website to meet the needs of the company.
